PERSONAL PROFILE

- Proactive and willing to learn
- Reliable and helpful
- Good team member
- Highly organized and can work under pressure

CAREER OBJECTIVE

Professional position on project management, system analysis and system development that can allow me to enhance and utilize my management and problem solving skills.

KEY SKILLS

- Solid Experience on asp.net, C#, C, C++, html, css, php, JavaScript, sql, Oracle DB, MVC Framework, Crystal Report
- Solid Experience on Java, J2EE , Spring MVC Framework
- Good Documentation handling (Functional Specification, Test Cases for Unit Test or UAT)
- Good Communication with user (obtaining user requirements and problem solving)

WORKING EXPERIENCE

● SEAMATCH ASIA LIMITED (CONTRACTOR OF HEWLETT PACKARD ENTERPRISE (HPE))

ANALYST PROGRAMMER

MAR 2017 - PRESENT

I participated in the project: *Revamp of Cultural and Leisure Programmes Searching System (CLPSS)* for The Leisure and Cultural Services Department. The project is revamp-based which rewrite ColdFusion scripts into Java. My role in this project is an analyst and providing programming opinions and instructions to programmers to follow.

My duties included:

- Documentation including System Specification, Requirement Specification, User Requirement etc.
- Communication with user to obtain exact requirement
- Providing Proof of Concept for the proposed system design
- Program Development, Unit Testing
- SIT, UAT Organizer

● GLOBAL TECHNOLOGY INTEGRATOR LIMITED

ANALYST PROGRAMMER

MAY 2016 – MAR 2017

I participated in the project: *Electronic Submission System* of Housing Department. The system is a C# .net based web application with Oracle DB and MVC Framework. My role in this project is not only a developer but mostly likely a bridge between the development team and the user. Although I took part in system enhancement but programming was not my main focus.

My duties included:

- Preparation of test script for UAT and Unit Test and Test Organizing
- Handling Ad-Hoc user enquiry
- Communication with user to obtain change request requirement
- System Enhancement

PROGRAMMER

MAY 2014 - APR 2016

I participated in the beginning stage of the project: *Electronic Submission System* of Housing Department. My role is a developer and mainly focus on programming. I involved in both front-end and back-end development which made me fully understood the architecture of the system.

My duties included:

- Front-end web design using html5, css3 and also Bootstrap framework.
- Back-end C# .net programming, Oracle Database 11g operation and ProjectWise API Programming
- Microsoft Crystal Report Programming
- PDF Digital Signing (Java)

EDUCATION

Bachelor Degree of Computer Engineering with Honors

The Chinese University of Hong Kong, 2016
